

# DeljooSoft

## Enterprise Web Platform & Modernization Specialist

Houston, Texas | Toronto, Ontario

### Executive Overview

DeljooSoft is a North American Enterprise Web Platform & Modernization Specialist supporting government and mid-to-large organizations in modernizing, securing, and scaling their digital platforms.

Operating from Houston, Texas and Toronto, Canada, DeljooSoft delivers architecture-led, governance-driven solutions designed for long-term operational stability, security, and performance.

With over 20 years of executive leadership experience in enterprise architecture, cloud systems, and secure application development, DeljooSoft provides senior-level accountability across the full platform lifecycle.

### CORE CAPABILITIES | They guide, they build, and they support properly.

#### 1. Enterprise Digital Strategy & Architecture Consultancy | *They guide*

DeljooSoft provides structured, vendor-neutral advisory services to ensure modernization initiatives are properly defined before execution.

- Digital transformation strategy development
- Vendor-neutral technology assessment
- Architecture blueprint development
- Cloud and modernization roadmaps
- Total cost-of-ownership and ROI analysis
- Governance and implementation planning

This phase reduces risk, clarifies scope, and aligns technology decisions with operational goals.

#### 2. Enterprise Platform Implementation & Modernization | *They build*

DeljooSoft designs and delivers secure, scalable enterprise platforms across web, application, and cloud environments.

- Government and enterprise website development
- WooCommerce enterprise eCommerce implementation
- React front-end applications
- .NET enterprise application modernization
- Azure-aligned cloud backend systems
- API integration and system interoperability

Technology is applied based on architectural fit, not preference, ensuring maintainable and scalable outcomes.

### 3. Enterprise Platform Support & Lifecycle Management | *They support*

DeljooSoft provides structured, long-term platform maintenance and operational stability services.

- SLA-based platform maintenance
- Security monitoring and vulnerability mitigation
- Patch and update management
- Backup and disaster recovery alignment
- Performance monitoring and diagnostics
- Change management workflows
- Incident coordination and resolution

This ensures enterprise platforms remain secure, compliant, and high-performing beyond launch.

## Distinguishing Characteristics

Executive Leadership with 20+ Years Experience | Applied AI Integration | Vendor-Neutral Advisory | Architecture-Led Delivery | Secure Development Practices | Procurement-Ready | Scalable, Maintainable Solutions

## Representative Experience
